

FRANCISCO GAETANO

Product Specialist | SaaS Platform Expert • Technical Diagnosis • Product Feedback Loop • AI-Native

Buenos Aires, Argentina (remote, US-time-zone friendly) | franciscogaetano1@gmail.com | +54 9 11 6051 8335
franciscogaetano.com | English: Fluent • Spanish: Native

SUMMARY

Product-minded specialist who owns the technical success of enterprise customers on a SaaS platform. I learn products end to end, diagnose behavior with authority, and turn the patterns I see across customers into prioritized product feedback that shapes the roadmap. Full-stack background (React, Node, TypeScript) so I go deep under the hood, not just on the surface. I work AI-native: I run a set of custom AI agents that handle recurring research, triage and documentation, so my hours go to the judgment and customer work that actually moves things. Certified Public Accountant (University of Buenos Aires) who moved into software; autonomous, async, and comfortable in a fast, distributed team.

WORK EXPERIENCE

Product Expert — Support Your App (Frontegg SaaS platform) | *Apr 2024 – Present*

- Resident expert on how the platform behaves end to end — from configuration and integrations to real-world edge cases — and the technical point of contact for a portfolio of enterprise customers.
- Diagnose complex behavior with authority (product vs. config vs. customer setup), drive root cause analysis with engineering, and build proof-of-concept apps to confirm behavior and unblock customers.
- Turn recurring problems seen across customers into prioritized product feedback, influencing workflow and documentation improvements on the roadmap.
- Own enablement: author knowledge-base articles and internal docs that sit between too-technical and too-marketing, cutting repeat questions across the team.
- Work the support queue as a direct line to how the product behaves in production, not as ticket-closing — every case feeds product understanding.
- Built and run a set of custom AI agents for recurring research, triage, debugging and documentation, maximizing throughput on repetitive work so my time goes to diagnosis and customers.

IT Consulting Analyst & Team Lead — Deloitte | *Apr 2022 – Apr 2024*

- Managed enterprise client relationships across the full delivery lifecycle, acting as point of contact and coordinating cross-functional teams to deliver results.
- Onboarded and trained new team members, helping them ramp up quickly and succeed in their roles.
- Delivered data solutions for enterprise clients, guaranteeing quality and reliability in production environments.

Freelance Web Developer — Self-employed | *Dec 2023 – Present*

- Build and support web applications and APIs for real clients (React, Node, TypeScript), managing each relationship end to end from scoping to delivery and follow-up. Portfolio: franciscogaetano.com

SKILLS

- **Product:** product diagnosis, feedback loop to PM, enablement & docs, adoption, demos & webinars, customer-facing technical support
- **AI-Native:** custom LLM agents (Claude, ChatGPT, Cursor) for research, debugging, documentation and analysis; prompt engineering; AI-assisted workflows to maximize output
- **Technical:** SaaS platforms, REST APIs, SSO/OAuth integrations, SQL, JavaScript / TypeScript, React, Node
- **Communication:** fluent English & native Spanish; moves between technical and non-technical people without losing either; writing-first
- **Ways of working:** proactive self-starter, high ownership, autonomous, async & remote / distributed teams

EDUCATION

University of Buenos Aires — Bachelor's Degree in Accounting (Certified Public Accountant), 2017–2021

Digital House — Full Stack Web Development, 2023
